e-Management Group: A Partner in Business ...

by Jonathan Dalli – Head of Marketing, e-Management Group

e-Management, a dedicated business division of HBM Group (est. 1991), with offices in reputable Online Gaming jurisdictions and International Financial Services Centers; is a leading turnkey provider of Business Support & Corporate Services to the Online Gaming Industry. Active in the industry since 1997, we are known as one of the industry pioneers in setting up, maintaining and licensing e-Gaming companies for renowned operators around the globe.

Our services offer both experienced and well-known large operators, as well as start-up e-Gaming clients in emerging markets alike; the necessary solutions to complement their e-Gaming business, enabling them to focus on their core business whilst their legal, tax and compliance structure is being taken care of. Our vast experience as "partner in business" to our clients leads to successful compliant operations in an ever growing and challenging e-Gaming environment. Our client portfolio ranges from publicly listed clients to start-ups. We have clients from each continent of the world, focusing on every market in the world!

As a closely held family firm, we are positioned as a professional, client oriented service group of companies focused on facilitating the process of establishing and managing international e-Gaming companies. As the need for our services increased, today we are considered to be a primary global corporate and business support services provider and market leader by assisting our clients in Malta, Curaçao, as well as (through our network) other jurisdictions, enabling our clients to grow when necessary beyond our boundaries (of service offering). Evident hereof was the establishment of our Malta office some years ago when the UK announced its white list. At the request of our clients we expanded our services and opened a full-fledged office in Malta. This is what we consider being a "partner in business".

Our integrity in our service offering is vital to our continuity and that of our clients. Therefore honesty, trust, reliability and confidentiality are key components of how we provide our services and more importantly how we treat our clients. In addition, as a service provider to the e-Gaming industry, we maneuver in a high-pace real-time environment. Time is of the essence and thus our continuous responsiveness as of day one of the relationship is of the essence to the success of our clients.

We are proud to be able to offer our global clients with international e-Commerce Company Solutions worldwide. That is why e-Management is the Intelligent choice!

Jonathan joined e-Management Group as Head of Marketing, after previously being Marketing Manager of a quad-player's provider in the Telecommunications Industry. He oversees all marketing activities, directs the group's marketing campaigns, events, brand management strategies, marketing communications & media relations, and strategic collaborations.

Jonathan has a number of years experience in iGaming Consultancy, marketing and business development whereby he was already involved in the licensing of various successful iGaming license applications. Furthermore, he is a Management Graduate, as well as a graduate from the Institute of Financial Services (UK).
